Fellow Students!

Devastated, our nation stands before the downfall of the men of Stalingrad. The world-war lance corporal's ingenious strategy has driven three hundred and thirty thousand German men to their death and destruction without reason or responsibility. Führer, we thank you!

There is growing unrest among the German people: Shall we continue entrusting the fate of our armies to a dilettante? Shall we sacrifice the remains of the German youth to the base power instincts of a party clique? Nevermore.

The Day of Reckoning has come, the reckoning of our German youth with the most despicable tyranny ever endured by our nation. In the name of all German youth, we demand from Adolf Hitler's state our personal freedom, the dearest possession of the Germans, of which he has cheated us in the most deplorable way. He "workers of the intellect" would be just good enough to act as the cudgel for this new master class. Frontline soldiers are disciplined like schoolboys by student leaders and aspiring gauleiters; gauleiters grope at female students' honor with lecherous pranks. German female students at Munich University have given a worthy response to the defilement of their honor; German male students have supported their female comrades and held their ground. This is a first step toward fighting for our free self-determination, without which intellectual values cannot be formed. Our thanks are due to the brave female and male comrades who have led the way with their shining example!

There is only one watchword for us: Fight against the party! Leave the party structures, through which they seek to keep a political muzzle on us! Leave the lecture theaters of the SS Junior and Senior Leaders and party bootlickers! What we care about is true science and genuine intellectual freedom! No threat can scare us off, not even the closure of our universities. What counts is the fight of every one of us for our future, our freedom, and honor in a state that is aware of its moral responsibility.

Freedom and honor! For ten long years, Hitler and his comrades have bled dry, thrashed, twisted these two glorious German words to the point of disgust, as only dilettantes can, who cast the highest values of a nation before the swine. What counts for them as freedom and honor they have amply shown over ten years of destruction of all material and intellectual freedom, of all moral substance in the German nation. The terrible bloodbath they have executed and continue to execute every day in the name of freedom and honor of the German nation across all of Europe has opened the eyes of even the stupidest German. The German name remains desecrated for all times, if the German youth does not finally arise, revenge, and atone together, crush its tormenters, and establish a new, intellectual Europe.

Students! The German people are looking to us! It expects of us, as in 1813 with the destruction of the Napoleonic system, so in 1943 the destruction of National Socialist terror through the power of the intellect.

Berezina and Stalingrad are flaming up in the East, the dead of Stalingrad beseech us! “Take heart, my people, the beacons are alight!”

Our nation is on the verge of rising up against the enslavement of Europe through National Socialism, in the new, devout breakthrough of freedom and honor!
